-------------------------------	---

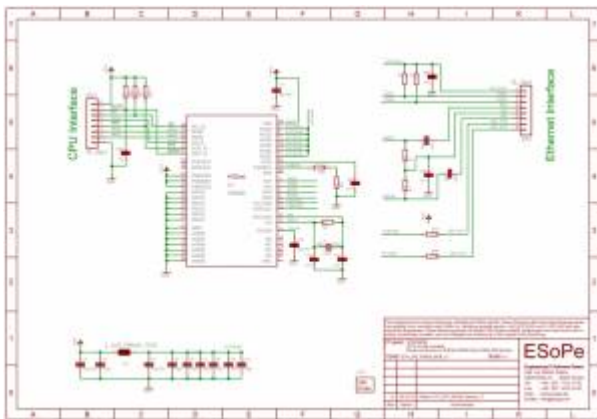

W5500BoB (ESoPe)

A small 'stamp' sized **“Break-out-Board”** Module with **W5500** chip + with 900mil distanced Pin-Headers 'Breadboard friendly' Footprint. The W5500's SPI I/F and PHY I/F is free available. You can use any RJ45 for the connection.

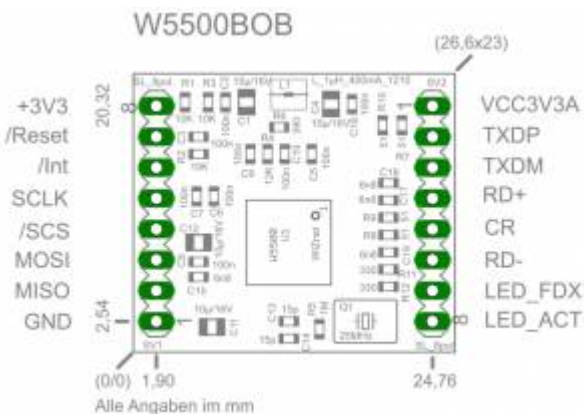

The **W5500BoB** Module is made by German company **ESoPe**. Here pictures of Top and Bottom side:

The **schematic** is here:

The **Pinout** of the Module in detail is here:

In the [WIZnet EU's Blog](#) is a nice explanation about how to connect RJ45 and make a short test setup.
